Jordana B. Harper, Superintendent of Schools

April 9, 2020

The Superintendent of Schools, Greenfield School Committee, and Greenfield Education Association are pleased to announce the release of our updated Remote Learning Plan for the Greenfield Public Schools.

During these difficult and uncertain times we all want to support the social, emotional, and intellectual development of our students by providing regular engagement opportunities and meaningful learning experiences. To that end, we have worked diligently to produce a plan that follows the guidance provided by the Department of Elementary and Secondary Education and incorporates input from students, families, and staff. Most importantly, we believe it meets the needs of our most vulnerable students while providing ongoing opportunities for our students to thrive for the duration of school closure.

This plan represents a very high level of collaboration among educators, administrators, and elected representatives that we believe produces the best outcomes for our students. While this process is more time-consuming, it results in a more comprehensive document that best considers and anticipates the needs of our students, families, and staff.

Faced with the unprecedented challenge of overhauling our entire system of learning since the Commissioner’s guidance just 10 working days ago, we are proud to present a plan that we believe will accomplish our common goal: the continued progress and achievement of Greenfield’s students.

Sincerely,

Greenfield Education Association
Greenfield School Committee
Superintendent of Schools
