Environmental Protection Agency regulations require that the School Department annually notify parents, teachers, and employee organizations that an asbestos management plan has been prepared in accordance with the Asbestos Hazard Emergency Response Act (AHERA, 40 CFR, Part 763 of Title II).

Asbestos Management Plans have been developed for the following list of educational facilities (Grades Pre-K-12) which have asbestos containing materials present. These plans are available and accessible to the public at each individual school office, at the School Department administration Building at 141 Davis Street.
