

**CURRICULUM AND INSTRUCTION**  
**Access to Electronic Media**

The Committee supports the right of students and employees, to have reasonable access to various information formats and believes it is incumbent upon users to utilize this privilege in an appropriate and responsible manner.

**Safety Procedures and Guidelines**

The Superintendent or designee shall develop and implement appropriate procedures to provide guidance for access to electronic media. Guidelines shall address teacher supervision of student computer use, ethical use of electronic media (including, but not limited to, the Internet, e-mail, and other District technological resources), and issues of privacy versus administrative review of electronic files and communications. In addition, guidelines shall prohibit utilization of networks for prohibited or illegal activities, the intentional spreading of embedded messages, or the use of other programs with the potential of damaging or destroying programs or data.

Internet safety measures shall be implemented that effectively address the following:

- Controlling access by minors to inappropriate matter on the Internet and World Wide Web;
- Safety and security of minors when they are using electronic mail, chat rooms, and other forms of director electronic communications;
- Preventing unauthorized access, including “hacking” and other unlawful activities by minors online;
- Unauthorized disclosure, use and dissemination of personal information regarding minors; and
- Restricting minors’ access to materials harmful to them.

The District shall provide reasonable public notice of its Internet safety measures.

**Permission/Agreement Form**

A written parental request shall be required prior to the student being granted independent access to electronic media involving District technological resources. The required permission/agreement form, which shall specify acceptable uses, rules of on-line behavior, access privileges, and penalties for policy/procedural violations, must be signed by the parent or legal guardian of minor students (those under 18 years of age) and also by the student. This document shall be kept on file as a legal, binding document. In order to modify or rescind the agreement, the student's parent/guardian (or the student who is at least 18 years old) must provide the Superintendent with a written request.

### **Employee Use**

Employees shall use electronic mail only for purposes directly related to work-related activities.

Employees shall not use a code, access a file, or retrieve any stored communication unless they have been given authorization to do so. (Authorization is not required each time the electronic media is accessed in performance of one's duties.) Each employee is responsible for the security of his/her own password.

### **Disregard of Rules**

Individuals who refuse to sign required acceptable use documents or who violate District rules governing the use of District technology shall be subject to loss or restriction of the privilege of using equipment, software, information access systems, or other computing and telecommunications technologies.

### **Responsibility for Damages**

Individuals shall reimburse the School District for repair or replacement of District property lost, stolen, damaged, or vandalized while under their care.

### **Responding to Concerns**

School officials shall apply the same criterion of educational suitability used to review other educational resources when questions arise concerning access to specific databases or other electronic media.

### **Audit of Use**

Users with network access shall not utilize District resources to establish electronic mail accounts through third-party providers or any other nonstandard electronic mail system.

The Superintendent or designee shall establish a process to determine whether the District's education technology is being used for purposes prohibited by law or for accessing sexually explicit materials. The process shall include, but not be limited to:

1. Utilizing technology that blocks or filters Internet access for both minors and adults to certain visual depictions that are obscene, child pornography, or, with respect to computers with Internet access by minors, harmful to minors;

2. Maintaining and securing a usage log; and
3. Monitoring online activities of minors.
